Play Again: What Happens When Kids Lose A Healthy Connection to Nature?

The average American child now spends more than seven hours a day in front of a screen —*playing video games, watching TV, surfing the Internet, texting friends via cell phone*—and the loss of contact with the natural world has implications not only for the well-being of the child but also for the future of the environment.

Cape Elizabeth Land Trust, Cape Elizabeth Schools and Parent Associations are bringing PlayAgain to community members on **Wednesday, February 15th at 7pm**. The free screening will be held in the Cape Elizabeth High School Auditorium. This film is recommended for children ages 10+ due to subject matter but parents know their kids best, so we leave it up to you. The documentary has an 80 minute run time. For a preview visit www.playagainfilm.com.
